

Front end developer (React)

Description

We have a fantastic new opportunity for a Frontend Developer to work on the world's leading fixed-income e-trading systems. With over \$450 million in quarterly revenues, the client is at the forefront of using the latest and most cutting-edge technology stack for their applications.

As a front end developer, this is arguably one of the most complicated but rewarding projects you could work on! Raising your profile and net worth as a software developer.

Only apply if you can join in 2-3 weeks (max) and are ready to undertake online tests as a part of the technical assessment process.

Responsibilities

- 8+ years of front end development experience
- Expert in CSS5, HTML5, Javascript and React
- Desirable experience with Highcharts or similar
- Desirable experience with Ag-grids
- Good understanding of REST and microservices communication
- Experience in unit testing
